Heavyweight Working Gloves. Hard-wearing models that tolerate rough treatment.

Heavyweight gloves that can take a beating. This is how we can summarise the gloves you will find here. Priority and emphasis are placed on protection and durability qualities. Materials that are selected with exactly these characteristics in mind. Wear them out and stay healthy.

Waterproof and water resistant gloves that keep you dry and warm.

We cannot govern the weather - but we govern our clothes. Warm and dry hands are always preferable, regardless of whether you work in the rain, or if you do wet work that means you splash around all day long. Here you will find everything from water resistant to waterproof models.

Winter-lined gloves that retain the warmth on all the cold days of the year.

The focus is on keeping the warmth in these gloves. Naturally. We always do our best, despite linings and tough materials, to make the gloves just as versatile as possible. We ensure that the material is compliant and that the lining is as thin as possible, without losing focus on thermal efficiency.

Welding/Hot work Safety, protection and high quality for hot work.

There are no shortcuts to protect your hands from a 1200°C welding flame. It must be of the highest quality, both the outer and inner materials and the lining in our gloves. Dexterity, sensitivity and good mobility must not be forgotten as it is important to maintain the fingertip sensitivity and deftness.

Cut protection. Highest safety and unique technical solutions.

Sharp gloves for handling sharp objects. Steel edges, knives, glass and other things are unpleasant to work with if you do not have the right gloves. We work with leading researchers in cut protection, and continually develop and improve our collection. Our aim is to always be able to offer the right kind of protection for the right application..

Guide CPN.

Gloves to protect you from really nasty and sharp objects. The goal of Guide CPN has been to combine versatility with a really high protection factor. For the CPN range we have created gloves suited to different professions and consequently different risk situations. We have gloves for law enforcement, security and rescue use. Gloves for offshore industries and the manufacturing industry. All models have the same unique function, and, we claim - the best protection on the market..

Chemical protection/ Short-term use gloves in versatile and safe materials.

Sometimes something as trivial as soap that hands must be protected against. Sometimes there are far worse things that can burn and cause serious injury. We have a breadth in our chemical and short-term use range of gloves that give you full protection at exactly the level you need.
