STRETCH YOUR LIMITS

L.Brador Workbook
SS 2018

Behind all our clothes and products lies a very clear concept. That they should make your working day easier, more comfortable and more functional, and we believe that good design and smart functions always go hand in hand. In this workbook we've collected all our new items from this year. Here are a few of our favourites.

You have one tool which is more important than every other tool in the toolbox. One which is more fragile, more valuable and more dynamic, and which can outperform all the other tools put together.

Your body.

We believe that it's easier to do a good job and stretch your limits if nothing is pulling or chafing, and if you can move freely and without hindrance.

That's why we've developed WorkMove™ in three different ranges, and why we want to help you become more mobile – and stretch your limits.

Let nothing stand in your way. Not yourself, not your ideas of what you think is possible and, least of all, not your trousers.

STRETCH YOUR LIMITS.

WORKMOVE™

Different professions and work scenarios require different trousers. That's why we've divided our stretch work trousers into three ranges: Max, Medium and Light. They're all designed to follow the body's natural movements, and to suit different types of work and work environment.

To achieve this, we work with the best materials on the market, Cordura stretch, Kevlar stretch and Dyneema. All to give you as a user extreme comfort, movability and durability.

No matter which range of stretch trousers you choose, you can be sure they'll make you feel more comfortable at work.

On the following two spreads we'll guide you to the right trousers for your working day.

WORKMOVE™
MAX

Maximised stretch zones with extreme durability and flexibility characterise our WorkMove™ Max trousers. 4-way stretch Cordura front and rear, in the crotch and on the calves provides maximum movability.

Knee-pad pockets with 4-way stretch Kevlar for extra durability.

What's more, we have our new full stretch trouser 1050PB with knee-pad pockets in Dyneema material.

WORKMOVE™
MEDIUM

Stretch trousers in the WorkMove™ Medium range feature generous stretch panels on the front and knees for great comfort while working. Front in 4-way stretch Cordura and knees in 4-way stretch Kevlar.

WORKMOVE™ LIGHT

The WorkMove™ Light range features stretch trousers in airy, light and slightly thinner fabric than the Max and Medium ranges. Generous number of stretch zones in 4-way stretch Cordura. Suitable for those who work in, for example, service, logistics, industry and warehousing, or who have particularly high demands on movability and comfort.

L.BRADOR 1050PB / 6023PB / 6001PS / 760

1050PB

PROPERTIES AND USER BENEFITS

- Full stretch trousers in 4-way stretch Cordura for extremely good movability, comfort and ventilation.
- Adjustable waistband in non-stretch material for the best fit.
- Nail pockets, leg pockets and rule pocket in non-stretch material.
- Stretch material and a narrower cut for a trouser with a closer fit and optimum comfort.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in Dyneema (4-way stretch).
- Nail pockets with zipped compartment for screw bits, for example.
- Zipped leg pocket for improved safety.
- Angled mobile phone pocket with magnetic clasp to keep your phone in place.
- Extendible by 5 cm.

MATERIAL AND WEIGHT:

88% polyamide, 12% elastane, 275 g/m²

SIZE

44-60, D84-D104

WORKMOVE™
MAX

The king of trousers.

1050PB is made completely from stretch material and could be described as the king of trousers. Here we combine maximum movability with extreme durability. The trousers are light and flexible, developed in close collaboration with our users – and based on high standards of comfort and quality.

L.BRADOR 1052PB / 9001P / 5140A / 767

1052PB

PROPERTIES AND USER BENEFITS

- Stretch material over the seat, front and crotch, as well as the front and rear sections of the knee for extremely good movability, comfort and ventilation.
- The use of stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced hanging pockets with increased volume.
- Ventilation on the inside thigh which is controlled with the aid of a zip, internally lined with mesh fabric to keep the user cool.
- On the left leg pocket there is a correctly angled phone pocket with a magnetic lock to keep the phone protected and in place.
- A strong half-Panama weave in polyester/cotton to give the best durability.
- Extendible by 5 cm.

MATERIAL AND WEIGHT:

65% polyester, 35% cotton. 325 g/m².

SIZE

44-60, D84-D120

WORKMOVE™
MAX

Premium trouser model.

The fact that 1052PB is our absolute pride and joy when it comes to trousers cannot be emphasised enough. Each detail has been thoroughly made - each function, each seam. Everything in the right place and made with the right quality. Produced and developed in close collaboration with people who work in them every day. Try for yourself - we're sure you'll like them.

WORKMOVE™
MAX

169PB

PROPERTIES AND USER BENEFITS

- Specially designed floor-layer pocket on the right thigh reinforced with cut protection in metallic weave to protect the user against sharp tools.
- Reinforced and extra long knee-pad pockets in stretch Kevlar provide both good movability and durability.
- Pre-shaped knees with zippers and ventilation at the back of the knees for individual fitting and flexibility.
- Reinforced hanging pockets with increased volume.
- Ventilation on the inside thigh which is controlled with the aid of a zip, internally lined with mesh fabric to keep the user cool.
- On the left leg pocket there is an angled phone pocket with a magnetic lock to keep the phone protected and in place.
- A strong half-Panama weave in polyester/cotton to give the best durability.
- Elastic at the leg hem to, for example, keep the trouser away from newly-painted floors.

A series in 0502-Y.

Tradition and practicality dictate that painters and brickworkers wear white. However, not so much has been said about fit and flexibility, which is a little strange considering both professions need room for movement.

Our series of painter trousers - full-length, three-quarter-length and shorts in the same model - therefore feature generous stretch panels and a thin main material, making them light, cool and flexible.

WORKMOVE™
MEDIUM

117PB

PROPERTIES AND USER BENEFITS

- Water and dirt-repellent.
- The weave structure ensures a strong garment.
- Stretch material in the front and front and rear sections of the knee for extremely good movability, comfort and ventilation.
- Using stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
- Extendible by 5 cm.
- Reinforced hanging pockets.
- Matches the structure and colour of jacket 425PB, 203PB and 204PB.
- The reflective panels are pliable, and give a degree of stretch with good breathability as well as greater durability as they stand up better against wear and tear in the wash.

MATERIAL AND WEIGHT:

80% polyester, 20% cotton. 310 g/m².

DON'T SCRATCH THE PAINT.

Things move fast at Börjessons Bil in Alingsås. Cars are serviced, engine parts are replaced and wheels are balanced. The premises are bright, clean and airy, and as of six months ago everyone who works on the cars wears work trousers from L.Brador's No-Scratch range.

Gunnar Burman moves comfortably around one of the cars, busy repairing the rear lights.

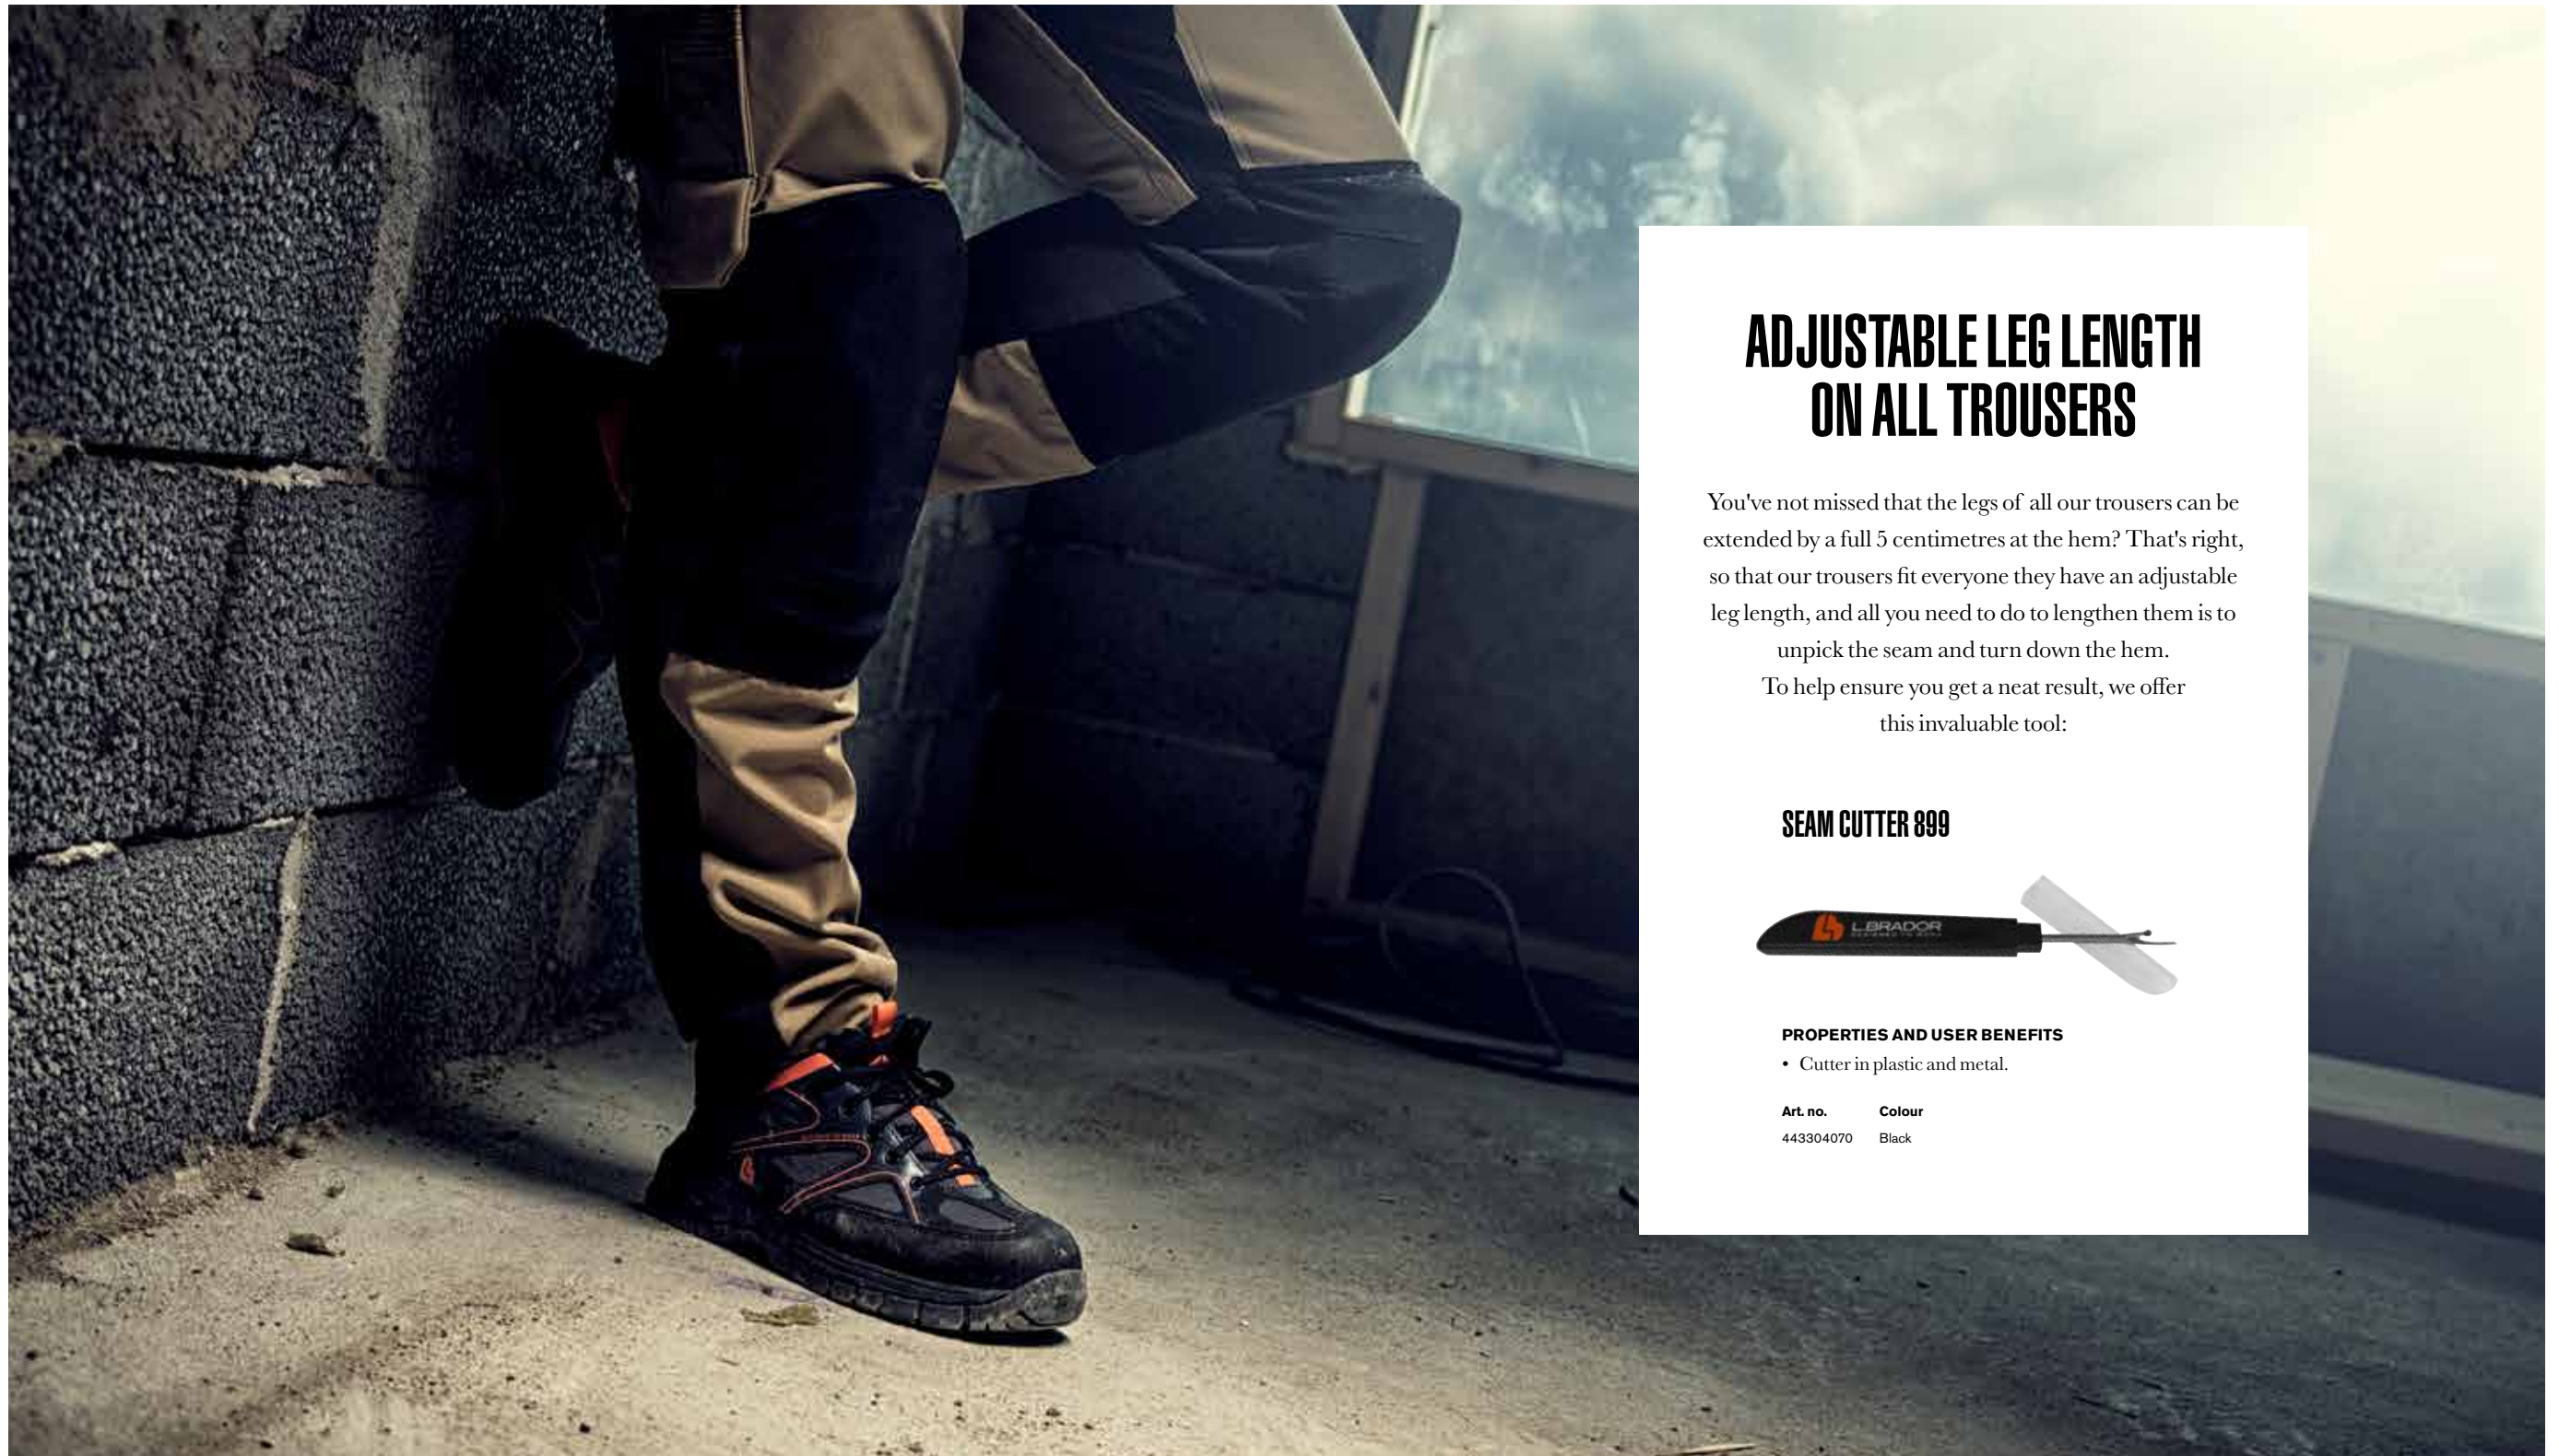

"Switching to stretch trousers without visible metal detailing means that you no longer have to worry about scratching painted surfaces. Now we can move around more freely, and there's no risk when leaning on or moving against the car," says Gunnar.

Read the full story from
Börjessons Bil at lbrador.com

WORKING BEHIND THE SCENES.

The NO-SCRATCH range gathers all our trousers with concealed metal detailing. And just as the name implies, they have absolutely no detailing which can scratch or scrape sensitive and delicate surfaces, such as cars, technical equipment and freshly painted kitchen cabinets. They're certainly useful in many different areas, and from our website you can download a catalogue full of tips and products for scenarios where you want to avoid scratching things.

ADJUSTABLE LEG LENGTH ON ALL TROUSERS

You've not missed that the legs of all our trousers can be extended by a full 5 centimetres at the hem? That's right, so that our trousers fit everyone they have an adjustable leg length, and all you need to do to lengthen them is to unpick the seam and turn down the hem.

To help ensure you get a neat result, we offer this invaluable tool:

SEAM CUTTER 899

HI- VIS

If you can't be seen, you're not there. We probably don't want to go that far, but on the other hand we know that you can only be seen if you make yourself visible. Basically it is about being clearly visible in environments where there are a lot of risks.

We develop our Hi-Vis garments using the same detailing and feel for quality as our other garments. We want them to be just as comfortable

and attractive to wear as our workwear without reflective panels. And as functional, of course. An example is our Hi-Vis garments that have stretch material reflective details from 3M - probably the best reflective material in the world. As you can understand, we never skimp on quality. With L. Brador you can be assured of garments that last for a long time and reflective details that you can trust to make you visible.

Faster and more versatile throughout the working day.

These trousers have been produced for those who frequently move around really quickly at work, often at around a hundred kilometers per hour. With truck and excavator drivers and other machine operators in mind, visibility is kept in focus. The trousers are made of a thin, cool, lightweight and flexible material suited for work in service sectors and for those of you who drive for a living.

185PB

PROPERTIES AND USER BENEFITS

- A strong half-Panama weave in polyester/cotton to give the best durability.
- Stretch material over the seat, front and crotch as well as the front and rear sections of the knee for extremely good movability, comfort and ventilation.
- Using stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- 7 mm kneepads included in the trouser for cushioning and comfort.
- Ventilation on the inside is regulated by a zip to keep the user cool.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.

Be seen, be safe.

With the aim of improving the working environment for today's professional drivers, these trousers were developed in close concert with the industry. A journey which resulted in, among other things, a strong half-Panama weave in polyester/cotton, 7 millimetres of cushioning on the knees and adjustable ventilation on the inner thigh for truly great comfort. What's more, the reinforced knee-pad pockets in stretch Kevlar provide both good movability and extreme durability.

160PB

PROPERTIES AND USER BENEFITS

- Water and dirt-repellent.
- Strong garment due to weave structure.
- Reinforced knees and thighs for better durability and to minimise the risk of flashing when manoeuvring machinery and vehicles.
- Matches structure and colour of jacket 203PB and winter jacket 203PB, 425PB and winter jacket 204PB.

STAY ACTIVE. STAY WARM.

Every step you take puts a load on your feet. Left, right, left, right. And so on, throughout the working day. You've probably heard it before, but it bears repeating; taking care of your feet is of the utmost importance, and if they feel good, you feel good. That's right, you have to keep on your toes in all manner of ways. Well-fitting shoes suited to your job are a given – and the same goes for your socks.

We've developed a range of socks for work and movement, and they follow the same clever divisions as our undergarments. For the layer closest to the body – and the feet – the two most important factors to take into account are the wicking and warmth they offer.

So we've divided our socks into four different levels: Active, Active+, Warm and Warm+, and just as the names suggest, they run along the scale from good wicking and cooler to less wicking and really warm. Which one is best suited to you is determined by your own body temperature, how much you move about and the season.

Our socks are all of the highest quality, and they're also reinforced at the toe and heel to minimise wear from your work shoes. On the next spread we take a closer look at their individual properties.

Active keeps your feet cool thanks to its very high wicking ability. This model is especially suitable if you generally have warm feet, move about a lot or mostly work indoors. The sock effectively wicks away moisture so as to avoid frozen feet which feel cold and stiff.

MODELS IN THIS LINE 757U | 746C

ACTIVE

Optimal moisture transport to keep body cool and dry for highly active work

Active+ is suitable not only when you're active, but also if you're prone to feel cold or when the temperature is lower. Maybe you work both indoors and out and want to be able to go in and out from time to time without your feet feeling the cold. Active+ still offers a consistently high degree of wicking, and ensures a cool feeling throughout the working day.

MODELS IN THIS LINE 754UB | 750U

ACTIVE+

Optimal moisture transport with temperature management for highly active work in cooler temperatures

Warm is a sock you can trust when the temperature drops, or if you work outdoors a lot during the winter season. And if you're someone who generally feels the cold, of course. Thanks to the high-quality material and a favourable wool blend, it offers good wicking, comfort and warmth.

MODELS IN THIS LINE 741U | 742U

WARM

Temperature management with good moisture transport for cooler temperatures

Warm+ keeps your feet warm on the very coldest days of the year. It's particularly suitable for outdoor work when the temperature has fallen a bit below zero, or if you have to stand still for long periods or work in really cold environments. Wool has many great properties, and besides naturally efficient wicking it keeps you warm in a really comfortable way.

MODELS IN THIS LINE 760UA

WARM+

High temperature management with moisture transport for very cold temperatures

L.BRADOR 746C

WARM+

The right feeling with every step.

That this woollen sock is included in the Warm+ category has an obvious explanation. It's really warm and comfortable, and keeps your feet warm even when the temperature drops sharply. At the same time, it also has the advantage of wicking away moisture, keeping your feet dry throughout the working day.

5009L

PROPERTIES AND USER BENEFITS

- Adapted to working practices in the Nordic region and Northern Europe.
- Holder for screwdriver and other tools. Simplifies working on, e.g. a ladder. The screwdriver hangs facing backwards to minimise the risk of injuries.
- The belt is upholstered and is held in place by a strong metal clasp. This allows for both quick locking and adjustments.
- Heavy-duty fabric pockets designed for both screws and nails. These are designed to provide easy access to the materials contained within.
- Holder for a knife on both the right and left sides, as well as for laser or chalk reel.
- The tool pocket is designed to make the hammer easy to grip and put back.
- Of course, the belt has pockets for a ruler, angle iron or chisel, as well as the classic pen pocket.
